ABC Corporation — IT Security Guidelines

1. Introduction

This document establishes the minimum information security standards that all employees, contractors, and third-party vendors must follow when accessing ABC Corporation's systems, networks, and data.

2. Password Policy

All user accounts must use passwords that are at least 12 characters long and contain a mix of uppercase letters, lowercase letters, numbers, and special characters. Passwords must be changed every 90 days and must not be reused within the last 6 password cycles.

Multi-factor authentication (MFA) is mandatory for all accounts with access to financial systems, customer data, or administrative privileges.

3. Device Security

All company-issued laptops must have full-disk encryption enabled and an approved antivirus solution installed and kept up to date. Employees must not disable security software under any circumstances without prior IT approval.

Personal devices used to access company email or documents (BYOD) must be enrolled in the company's Mobile Device Management (MDM) system.

4. Data Classification and Handling

Company data is classified into four categories: Public, Internal, Confidential, and Restricted. Confidential and Restricted data must never be stored on personal devices or unauthorized cloud storage services.

Any transfer of Restricted data outside the company network requires encryption and prior written approval from the Information Security team.

5. Incident Reporting

Any suspected security incident, including phishing attempts, lost devices, or unauthorized access, must be reported to the IT Security team within 1 hour of discovery via the internal incident reporting portal or

the security hotline.

6. Remote Access

Remote access to internal systems is only permitted through the company-approved VPN client. Split tunneling and use of public Wi-Fi without VPN protection are strictly prohibited when accessing Confidential or Restricted data.

7. Compliance and Enforcement

Violations of this policy may result in disciplinary action, up to and including termination of employment, and may also carry legal consequences depending on the severity of the breach.
